### DIMMABLE WITH WALL DIMMER

Combine the trailing edge dimmer with a dimmable 12V DC transformer. Although the load of the light is very low, combined with the Yphix 230V dimmer you'll have a great dimming range! When choosing the transformer, please note that the transformer should be loaded with a maximum of 80% of its capacity. This can be calculated easily by counting up the wattages of all the connected lights.

## DIMMABLE WITH RF REMOTE 5 ZONES

Dim wireless with an RF remote? Choose the LED dimmer CV 5ZD combined with a non-dimmable 12V DC LED transformer. This dimmer will be placed between the transformer and the LED light beam. Unique in this combination is, that you can dim multiple LED light beams wireless with only one remote, and you can also add a connection on a fixed point on the wall, like a pulse switch or wireless wall remote

When choosing the transformer, please note that the transformer should be loaded with a maximum of 80% of its capacity. This can be calculated easily by counting up the wattages of all the connected lights.
